

ANYONE CAN SAVE A LIFE WITH NALOXONE

FREE NARCAN® HERE

Naloxone (Narcan®) is a medication that reverses the effects of an opioid overdose. Anyone at risk of having or seeing an opioid overdose, or who spends time with people who use opioids should consider carrying naloxone.

Just ask an Emergency Department staff member for Naloxone or Narcan®. A staff member will provide a rescue kit after going over the signs and symptoms of an opioid overdose and how to use Narcan.

These services are supported in-full or in-part by a contract to Southern Illinois Healthcare from the Illinois Department of Human Services, Division of Substance Use Prevention and Recovery, as part of the Illinois Opioid-State Targeted Response grant from the U.S. Department of Health and Human Services, Substance Abuse and Mental Health Services Administration (TI-083278).
